100-level “Basics of Organizing”

Basics of Organizing starts participants off with the foundational skills that UUP members need to be effective organizers, as well as a solid understanding of the theory and practice of union organizing.

200-level “Applied Organizing”

The Applied Organizing series takes the individual skills that member-organizers learn in the 100-level trainings and extend them to larger-scale projects: team-building and campaigns. Here is where member-organizers learn to handle organizing project coordination.
